Question 1

Flag question

Correct Mark 1.00 out of 1.00

An organisation uses Claude to generate customer emails that are sent automatically. The most important control is:

a. Human review before any email is sent
b. Setting temperature to zero
c. Using the most capable model available
d. Limiting email length to 100 words

The correct answer is: Human review before any email is sent

Question 2

Flag question

Correct Mark 1.00 out of 1.00

What is the primary benefit of a "draft and review" workflow compared to direct publication?

a. It reduces API costs by caching drafts
b. It makes Claude generate shorter outputs
c. It allows multiple model versions to compete on each draft
d. It combines Claude's speed with human judgement before outputs reach users

The correct answer is: It combines Claude's speed with human judgement before outputs reach users

Question 3

Flag question

Correct Mark 1.00 out of 1.00

An integration requires Claude to respond consistently to the same question regardless of how users phrase it. The most effective prompt control is:

a. Using a pre-processing step to normalise all inputs to a standard form
b. Setting temperature to zero
c. Including examples of varied phrasings with the same correct answer in the system prompt ✓
d. Caching responses for common questions

The correct answer is: Including examples of varied phrasings with the same correct answer in the system prompt

Question 4

Flag question

Correct Mark 1.00 out of 1.00

A team is adopting Claude for the first time. The most effective starting approach is:

a. Deploying all planned use cases simultaneously to capture maximum early value
b. Starting with one well-scoped, lower-risk use case to build experience before expanding ✓
c. Waiting until the team completes a full prompt engineering certification
d. Starting with the most complex use case to build maximum capability early

The correct answer is: Starting with one well-scoped, lower-risk use case to build experience before expanding

Question 5

Flag question

Correct Mark 1.00 out of 1.00

The EU AI Act classifies a Claude system used for CV screening as:

a. Prohibited under automated hiring rules
b. High risk, requiring conformity assessment and human oversight measures before deploy ✓
c. Limited risk requiring only a transparency notice to candidates
d. Minimal risk with no specific obligations

The correct answer is: High risk, requiring conformity assessment and human oversight measures before deploy

Question 6

Flag question

Correct Mark 1.00 out of 1.00

A practitioner wants to measure whether a Claude workflow is actually improving business outcomes. The most appropriate metric is:

a. The average automated quality score per response
b. The number of Claude API calls per day
c. The reduction in average response latency since launch
d. A business outcome metric tied to the problem the workflow was designed to solve ✓

The correct answer is: A business outcome metric tied to the problem the workflow was designed to solve

Question 7

Flag question

Correct Mark 1.00 out of 1.00

What is the most critical element to document when a Claude workflow goes live?

a. The list of features planned for future versions
b. The total development time and cost
c. The engineering team members who built the integration
d. The exact system prompt, model version, quality baselines, escalation paths, and monitoring approach ✓

The correct answer is: The exact system prompt, model version, quality baselines, escalation paths, and monitoring approach

Question 8

Flag question

Correct Mark 1.00 out of 1.00

An organisation is choosing between building a custom Claude integration or using a pre-built AI product. The primary evaluation criterion is:

a. Which option the engineering team is most familiar with
b. Which option has the lower upfront cost
c. Whether the pre-built product meets specific requirements without costly customisation ✓
d. Which option has the most third-party integrations listed

The correct answer is: Whether the pre-built product meets specific requirements without costly customisation

Question 9

Flag question

Incorrect Mark 0.00 out of 1.00

A Claude deployment serves 10 developers internally. Which governance control can be relaxed compared to a consumer product?

a. Data handling and privacy obligations ⊗
b. Output accuracy requirements
c. Formal onboarding UX and polished interface design
d. Human oversight for high-stakes outputs

The correct answer is: Formal onboarding UX and polished interface design

Question 10

Flag question

Incorrect Mark 0.00 out of 1.00

What is the most effective way to ensure a Claude deployment stays accurate as business context evolves?

a. Switching to a newer Claude model each quarter
b. Rebuilding the system prompt every month
c. Having users report outdated answers via a feedback button
d. A retrieval layer updated when content changes, so knowledge updates without prompt rewrites ⊗

The correct answer is: Having users report outdated answers via a feedback button

Question 11

Flag question

Correct Mark 1.00 out of 1.00

A Claude workflow produces correct outputs for structured inputs but fails on informal ones. This indicates:

a. The context window is too small
b. Temperature is set too high
c. The model tier is insufficient
d. The system is not robust to natural input variation ✓

The correct answer is: The system is not robust to natural input variation

Question 12

Flag question

Correct Mark 1.00 out of 1.00

A solution performs well in testing but fails in production. The most likely cause is:

a. The model version changed after testing
b. The system prompt was altered at deploy
c. Real user inputs are messier than test inputs ✓
d. The production API behaves differently

The correct answer is: Real user inputs are messier than test inputs

Question 13

Flag question

Correct Mark 1.00 out of 1.00

When should a simple rule-based system be preferred over Claude?

a. When the team lacks prompt engineering experience
b. When response speed matters most
c. When the logic is fully deterministic and expressible in rules ✓
d. When the task involves any personal data

The correct answer is: When the logic is fully deterministic and expressible in rules

Question 14

Flag question

Correct Mark 1.00 out of 1.00

What is the primary reason to pilot a Claude workflow before full deployment?

a. To validate quality with real inputs before committing to full-scale rollout ✓
b. To reduce the initial API subscription cost
c. To give engineers time to resolve code debt before launch
d. To satisfy procurement phased delivery requirements

The correct answer is: To validate quality with real inputs before committing to full-scale rollout

Question 15

Flag question

Incorrect Mark 0.00 out of 1.00

When building a Claude integration for a financial services firm, which obligation most directly shapes the architecture?

a. Maintaining audit logs of all AI-generated communications for regulatory review
b. Disabling streaming for all responses
c. Using only the highest-capability model
d. Encrypting all API traffic end-to-end

The correct answer is: Encrypting all API traffic end-to-end

Question 16

Flag question

Correct Mark 1.00 out of 1.00

Which pattern handles mixed-complexity queries most cost-effectively?

a. Always using the most capable model to ensure quality on hard queries
b. Caching responses for all queries to avoid repeated API calls
c. A routing layer directing simple queries to Haiku and complex ones to Sonnet or Opus
d. Always using the cheapest model to keep costs low

The correct answer is: A routing layer directing simple queries to Haiku and complex ones to Sonnet or Opus

Question 17

Flag question

Incorrect Mark 0.00 out of 1.00

An existing Claude integration needs to handle a new category of user query not in the original design. The correct approach is:

a. Deploy a separate Claude instance dedicated to the new category
b. Add targeted instructions and examples for the new category, then run regression evals to confirm existing categories still pass
c. Rebuild the entire integration from scratch to cleanly accommodate the change
d. Ask users to rephrase queries to fit the existing design

The correct answer is: Deploy a separate Claude instance dedicated to the new category

Question 18

Flag question

Correct Mark 1.00 out of 1.00

A user requests deletion of their personal data stored from Claude interactions. Under GDPR, the operator must:

a. Forward the request to Anthropic for processing
b. Have a process to identify and delete the user's data from interaction logs ✓
c. Delete it within 72 hours of the request
d. Anonymise the data rather than delete it

The correct answer is: Have a process to identify and delete the user's data from interaction logs

Question 19

Flag question

Incorrect Mark 0.00 out of 1.00

An organisation is unsure whether a planned Claude use case complies with GDPR. The correct response is:

a. Seeking legal advice before deployment, not after
b. Adding a disclaimer and monitoring for complaints post-launch
c. Proceeding since Anthropic's API is GDPR compliant on their side
d. Deploying to a small test group to see if regulatory concerns emerge ✗

The correct answer is: Seeking legal advice before deployment, not after

Question 20

Flag question

Correct Mark 1.00 out of 1.00

A Claude deployment handles health records in the United States. Which regulation is most directly applicable?

a. SOC 2
b. HIPAA ✓
c. GDPR
d. PCI-DSS

The correct answer is: HIPAA
