Question 1

Flag question

Correct Mark 1.00 out of 1.00

A practitioner discovers a security vulnerability in a Claude integration. The correct immediate action is:

a. Patching it silently to avoid alarming stakeholders
b. Escalating through the defined incident response process and assessing whether a breach occurred ✓
c. Asking Claude to self-assess the severity of the vulnerability
d. Waiting for the next scheduled maintenance window

The correct answer is: Escalating through the defined incident response process and assessing whether a breach occurred

Question 2

Flag question

Correct Mark 1.00 out of 1.00

A user requests deletion of their personal data held in a Claude deployment's logs. Under GDPR's right to erasure, the operator must:

a. Forward the request to Anthropic within seven days
b. Anonymise the data rather than delete it
c. Respond within 72 hours with a deletion timeline
d. Have a process to identify and delete the user's data from all logs on request ✓

The correct answer is: Have a process to identify and delete the user's data from all logs on request

Question 3

Flag question

Correct Mark 1.00 out of 1.00

PCI-DSS is triggered for a Claude deployment that:

a. Processes cardholder data in the context of payment card transactions
b. Is deployed by a financial institution
c. Generates financial reports for auditors
d. Processes any payment-related queries

The correct answer is: Processes cardholder data in the context of payment card transactions

Question 4

Flag question

Correct Mark 1.00 out of 1.00

What is a "blameless post-mortem" after a Claude incident?

a. An external audit by a third-party assessor
b. A structured review focused on systemic causes and improvements, not individual blame
c. A legal document prepared by counsel
d. An automated report from the API logging system

The correct answer is: A structured review focused on systemic causes and improvements, not individual blame

Question 5

Flag question

Correct Mark 1.00 out of 1.00

A GDPR breach notification must be sent to the supervisory authority when:

a. Any personal data is accidentally shared with a wrong recipient
b. The breach involves more than 100 records
c. The breach is likely to result in risk to individuals' rights and freedoms
d. The breach affects data in a cloud environment

The correct answer is: The breach is likely to result in risk to individuals' rights and freedoms

Question 6

Flag question

Incorrect Mark 0.00 out of 1.00

Who is accountable for ensuring a Claude deployment complies with Anthropic's usage policies?

a. The engineering team that built the integration
b. The operator, who accepted the policies when accessing the API
c. End users, since they generate the inputs
d. Anthropic, since it trains and hosts the model

The correct answer is: The operator, who accepted the policies when accessing the API

Question 7

Flag question

Correct Mark 1.00 out of 1.00

Which behaviour cannot be changed by any operator instruction?

a. Refusing to help create weapons capable of mass casualties
b. Using markdown formatting in responses
c. Responding in the user's language
d. Adding caveats to sensitive topics

The correct answer is: Refusing to help create weapons capable of mass casualties

Question 8

Flag question

Incorrect Mark 0.00 out of 1.00

"Purpose limitation" under GDPR means data collected in a Claude interaction:

a. Must be deleted after the session ends
b. Cannot be stored in a non-EU jurisdiction
c. Must be encrypted at rest
d. May only be used for the purpose stated at the time of collection

The correct answer is: May only be used for the purpose stated at the time of collection

Question 9

Flag question

Correct Mark 1.00 out of 1.00

An operator instructs Claude to always respond even when it does not know the answer. Claude should:

a. Follow it only if the user has consented
b. Follow the instruction to maximise helpfulness
c. Follow it only for low-stakes queries
d. Refuse — this would cause Claude to fabricate rather than acknowledge uncertainty ✓

The correct answer is: Refuse — this would cause Claude to fabricate rather than acknowledge uncertainty

Question 10

Flag question

Correct Mark 1.00 out of 1.00

A user sincerely asks whether they are talking to a human or an AI. Claude is operating under a human persona named "Jamie." Claude must:

a. Acknowledge being an AI despite the persona ✓
b. Deflect the question and change the subject
c. Maintain the Jamie persona and say it is human
d. Ask why the user wants to know before answering

The correct answer is: Acknowledge being an AI despite the persona

Question 11

Flag question

Correct Mark 1.00 out of 1.00

When a Claude output causes harm to a user, the first step in incident response is:

a. Deleting API logs to protect user privacy
b. Updating the system prompt to prevent recurrence
c. Containing the immediate harm and preserving evidence before any other action ✓
d. Notifying Anthropic immediately

The correct answer is: Containing the immediate harm and preserving evidence before any other action

Question 12

Flag question

Correct Mark 1.00 out of 1.00

What is mean time to detect (MTTD) measuring in a Claude governance context?

a. How quickly the organisation discovers safety or quality incidents
b. Average time for a user to receive help after submitting a query
c. Time between model version updates
d. Average time for Claude to generate a response

The correct answer is: How quickly the organisation discovers safety or quality incidents

Question 13

Flag question

Correct Mark 1.00 out of 1.00

An organisation is uncertain whether their planned Claude use case complies with applicable regulation. The correct response is:

a. Proceeding since Anthropic handles compliance on their behalf
b. Deploying to a small test group to check if regulatory issues emerge
c. Adding a disclaimer and monitoring for complaints
d. Seeking legal advice before deployment, not after

The correct answer is: Seeking legal advice before deployment, not after

Question 14

Flag question

Correct Mark 1.00 out of 1.00

An effective incident response plan for a Claude deployment must include:

a. Anthropic's direct involvement in all investigations
b. Pre-defined procedures, roles, and communication templates for each response phase
c. A fixed 30-day resolution timeline for all incident types
d. A daily review of all API responses

The correct answer is: Pre-defined procedures, roles, and communication templates for each response phase

Question 15

Flag question

Correct Mark 1.00 out of 1.00

A UK organisation wants to deploy Claude for automated decision-making in credit scoring. The regulation most directly governing this is:

a. UK GDPR and the Financial Services regulation framework
b. HIPAA
c. PCI-DSS
d. EU AI Act

The correct answer is: UK GDPR and the Financial Services regulation framework

Question 16

Flag question

Correct Mark 1.00 out of 1.00

A "quality drift" alert in a monitoring system fires when:

a. API costs exceed the monthly budget limit
b. A tracked quality metric drops below a defined threshold indicating silent degradation
c. A new Claude model version is released
d. Response latency exceeds an SLA threshold

The correct answer is: A tracked quality metric drops below a defined threshold indicating silent degradation

Question 17

Flag question

Correct Mark 1.00 out of 1.00

What does "metatransparency" mean in Anthropic's governance model?

a. Claude always reveals its system prompt
b. Operators must publish their system prompts
c. Users can request a full audit log
d. Anthropic publishes its framework for what operators can and cannot instruct Claude to do

The correct answer is: Anthropic publishes its framework for what operators can and cannot instruct Claude to do

Question 18

Flag question

Correct Mark 1.00 out of 1.00

What is the governance significance of version-controlling system prompts?

a. It reduces prompt token costs over time
b. It prevents other teams from accessing system prompt content
c. It satisfies Anthropic's audit requirements
d. It creates an auditable history enabling regression analysis and rollback when quality degrades

The correct answer is: It creates an auditable history enabling regression analysis and rollback when quality degrades

Question 19

Flag question

Correct Mark 1.00 out of 1.00

The most important thing to communicate to affected users after a Claude output caused them harm is:

a. That the issue has been resolved and will not happen again
b. That the incident was caused by a model limitation outside the operator's control
c. What happened, what impact it may have had, and what they should do next
d. That a full technical investigation is underway

The correct answer is: What happened, what impact it may have had, and what they should do next

Question 20

Flag question

Correct Mark 1.00 out of 1.00

Immutable audit logs serve what primary governance function?

a. Reducing API costs by caching repeated queries
b. Speeding up retrieval of common responses
c. Providing tamper-proof records for incident investigation and regulatory review
d. Enabling Claude to learn from past sessions

The correct answer is: Providing tamper-proof records for incident investigation and regulatory review
